Final Exam Test Bank

1. For most *privately* insured Americans, health insurance is:
   a. Employer based
   b. Financed by the government
   c. Privately purchased
   d. None of the above

2. The role of the federal government in the U.S. health care system is:
   a. Regulator
   b. Major financer
   c. Medicaid reimbursement rate setter
   d. All of the above

3. A truly free market in health care would require:
   a. Adequate information for patients
   b. Independent actions between buyers (patients) and sellers (providers)
   c. Unencumbered interaction of the forces of supply and demand
   d. All of the above

4. In 1965, Medicare was created as:
   a. A program to ensure health insurance coverage for the poor
   b. A program to reimburse hospitals for care of those over 65 and those with disabilities
   c. An insurance program that focuses on those with disabilities
   d. An entitlement program for those 65 and above that provides health insurance

5. Health care in the United States:
   a. Has emphasized intensive, high-technology care
   b. Reimbursed primary care providers at a higher rate than specialists
   c. Focused on community-based care rather than acute care
   d. All of the above

6. Big data:
   a. Is the term used for medical records in patient-centered medical homes
   b. Is synonymous with the term *value-based data*
   c. Uses a variety of data sources
   d. All of the above

7. All of the following are examples of cost sharing EXCEPT:
   a. Deductibles that must be reached before insurance will reimburse providers
   b. Copayments that must be paid at each provider visit
